EDUCATION

Indian Institute of Technology Kharagpur

M.Tech in Agricultural Systems and Management

2026

CGPA: 8.34/10.0

S.V.P.U.A.T, Meerut

B.Tech in Agricultural Engineering

2023

CGPA: 8.398/10.0

INTERNSHIP

Euphoria Infotech India Limited

Generative AI Intern

May 2025 – July 2025

- Designed and built a multilingual query chatbot for legal and ed-tech domains, enabling conversational Q&A on complex PDF documents.
- Engineered the end-to-end RAG pipeline using LangChain, integrating OCR for scanned files, a ChromaDB vectorstore, and history-aware retrieval to ensure contextual accuracy.
- Contributed to an AI document scanner, improving alignment and reducing scan errors by 15% via page skew detection and OCR for printed and handwritten scanned files.

PROJECTS

AI Hiring Assistant Chatbot | *Generative AI, LangChain, HuggingFace, LLMs*

Self Project

- Developed a conversational AI chatbot to automate and streamline the initial stages of the recruitment process.
- Utilized Large Language Models (LLMs) and LangChain to build a system capable of parsing resumes, screening candidates, and asking initial qualifying questions.
- Designed the chatbot to intelligently answer candidate questions about job descriptions and company policies, significantly improving candidate engagement.

Impact of Soil Quality on Crop Growth Analysis | *Pandas, Scikit-learn, Matplotlib*

Prof. Subhamoy Mandal

- Developed a data-driven crop recommendation system using Python for data analysis and visualization.
- Leveraged ML models like K-Nearest Neighbors and K-Means clustering for accurate crop recommendations.
- Conducted statistical analysis with hexbin/scatter plots to visualize optimal conditions for precision agriculture.

Email / SMS Spam Classifier | *Python, Scikit-learn, NLTK, TF-IDF*

Self Project

- Executed comprehensive data preprocessing including text normalization, handling missing values, and deduplication.
- Built a text pipeline with tokenization and TF-IDF to train Naive Bayes, Logistic Regression, and KNN models.
- Achieved 98% precision by optimizing models via cross-validation and hyperparameter tuning.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK, TensorFlow, Plotly, Flask, Streamlit, LangChain, HuggingFace

Technical Skills: Natural language Processing, Machine Learning, Deep Learning, Generative AI, LLMs, RAG, OCR, Statistics, MCP, Feature Engineering, EDA, Data Cleaning

Tools & Platforms: MySQL, GitHub, Google Colab, VS Code, Jupyter Notebook, PyCharm, MS Office

Soft Skills: Time Management, Problem Solving, Teamwork, Adaptability, Communication, Critical Thinking
